

POTENTIAL Unexploded Ordinance (pUXO) Identified 37 Nautical Miles Offshore New Jersey

High resolution bathymetric survey work identified a target on the seabed that is considered a potential unexploded ordinance (pUXO). The potential hazard is approximately 36.8 nautical miles east-southeast of Barnegat Inlet, New Jersey. The U.S. Coast Guard has been notified of the potential UXO. Fishermen and mariners interacting with the seabed are urged to note the location and take precautions to avoid the potential UXO hazard.

Reported location

Latitude: 39° 28.15868' N
Longitude: 73° 23.68847' W
Datum: NAD83(2011)
Water depth: ~121 feet

Community Offshore Wind will avoid and route around any potential UXOs to the greatest extent possible. Avoided potential UXOs will be left in place. Additional surveys will be conducted prior to the start of construction to confirm the presence of potential UXOs and any follow up actions will be taken with the appropriate authorities at that time.
